

## COPENHAGEN DISTILLERY WHISKY RAW EDITION BATCH NO.1 2020

SKU: MWCDRW

Copenhagen Distillery was founded in 2015 as the city's first craft distillery, and has innovated since its inception. With an initial focus on gin and aquavit, whisky-making was always part of the plan. This whisky is the 1st release in from their Raw range - a range focused on distillation and maturation methods that retain the core, raw aromas of the grains used in distillation (they also have Rare and Refined ranges, with different philosophies). A single malt Danish whisky, this was double and triple-distilled in a small, 300-litre still, using top-quality local, organic, unpeated, pilsner barley malt, giving a clean, crisp expression. Maturation uses virgin, air-dried, medium-toasted, small (100-litre) Hungarian oak barrels that reinforce the clean, clear characteristics. Tasting note: remarkably rich, yet with a fresh floral nose. On the palate its very malty, peppery flavours are accompanied by subtle earthy notes.
