

## GRACIOUS CABERNET SAUVIGNON

SKU: FRCDVCS

The Pays d'Oc region benefits from the Mediterranean climate which provides hot, dry summers for a perfect maturity. On the other side, the Montagne Noire brings enough humidity and cool temperatures for the vineyards to produce grapes packed with rich, fruity notes yet with balanced structure and freshness. Cabernet Sauvignon needs ripeness to show its full potential which is why the winemaker carefully selects the perfect time for harvesting each particular vineyard. The grapes are destemmed and crushed before they are sent to ferment and macerate for about four weeks, extracting colour, flavour and tannins.
