

## RHUM ST. BARTH SE METTRE AU VERT

SKU: RUSBMV

Rhum agricole is fast becoming a favourite of bartenders worldwide, and we invite you to discover exactly why. In contrast to traditional rums, which are distilled from molasses created as a byproduct of the process of sugar manufacture, the Francophone Caribbean speciality of rum agricole distils pure sugarcane juice. The result is a mouthwateringly fresh beverage, with distinctive grassy, herbaceous aromas and more intense tropical fruit. It is these unique qualities which have led to the widespread adoption of the spirit in classic rum cocktails – directly leading to the establishment of Rhum St Barth. This distillery was founded by Severine and Mikael Silvestre in 2010 on the island of Guadeloupe, in the heart of the Caribbean, with the express purpose of supplying expert mixologists with the ultimate cocktail rums. Se Mettre Au Vert is a white rum agricole which hits the sweet spot of 44% alcohol by volume – enough to still be tasted in a mixed drink such as rum and cola, but not too much that the alcohol becomes overpowering and the spirit loses its character.
