

KOSKENKORVA NORDIC BERRY

SKU: VOKNB

Since 1953, this renowned distillery has transformed locally sourced barley and pristine spring water into an award-winning vodka of exceptional purity. Distilled over 250 times using an advanced nine-column process, it achieves an unparalleled smoothness without the need for additional filtering. The barley, harvested within a 200 km radius, thrives under the Arctic sun, enhancing its starch content for a cleaner, more efficient fermentation. Every bottle contains roughly 18,200 grains of this premium barley, combined with Finland's pure, unfiltered spring water from Rajamäki. This dedication to quality has earned Koskenkorva numerous international accolades, including the prestigious title of Master in The Vodka Masters' Premium category.

Beyond excellence in distillation, sustainability is at the core of Koskenkorva's philosophy. As a pioneer in circular economy practices, the distillery runs predominantly on bioenergy, recycles 99.9% of materials, and has reduced CO₂ emissions by 50%. With a commitment to regenerative agriculture and carbon-neutral production by 2026, Koskenkorva is on a mission to become the world's most sustainable vodka.
