

SIPSMITH LONDON DRY GIN

SKU: GISS

Sipsmith was born out of a desire to see gin production return to the city where it earned its name. With a nod to traditional hand crafted production, their London Dry Gin combines traditional copper pot distillation with a recipe that wouldn't look unfamiliar to an eighteenth century Master Distiller.

Sipsmith London Dry Gin is multi award-winning; a marriage of a traditional recipe of 10 classic botanicals and a genuinely hand crafted process delivering a quintessential expression of the London Dry Gin style.

One of the only gins in the world to be made using the uncompromising 'One Shot' method. Each day, Sipsmith add precisely the amount of botanicals needed to make one batch of gin to each still – never adding more to create a gin concentrate.
