

## SW4 LONDON DRY GIN

SKU: GISW4

SW4 London dry gin uses 12 botanicals. This gin is always a batch distillation, done in a traditional pot still. Neutral grain spirit is added into the pot still, together with the botanicals.

The botanicals contain essential oils immediately below the skin of the seed, berry, peel or bark and it is the extraction of these, in the presence of alcohol, that gives SW4 London Dry Gin its unique flavour.
